Safety Information

WARNING: Safety Instructions

WARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.

Please read safety and instructions for use before operating the device.

Please retain this user's guide for future reference.

For information on safety instructions, see the *Safety, Environmental, and Regulatory Information*.

Symbols on the Device

Symbol	Location	Explanation
	Rear	Indicates manufacture's serial number.
	Rear	Indicates the date of manufacture.
	Rear	This device complies with local regulations for disposal of electronic products.
	Rear	Follow operating instructions for use.
	Rear	This device complies with Part 15 Class B of the FCC rules.
	Rear	Indicates Direct Current (DC).
	Rear	Indicates the device is approved according to the cTUVus regulations.

Symbols on the Box

Symbol	Explanation
	<p>Contents of the transport package are fragile therefore it shall be handled with care.</p>
	<p>Transport package shall be kept away from rain.</p>
	<p>Indicates correct upright position of the transport package.</p>
	<p>Maximum number of identical packages that may be stacked, where "n" stands for the number of permitted packages</p>
	<p>Indicates temperature limits within which the transport package shall be stored and handled. NOTE: Values for "xx" and "yy" can be found in the Environmental Characteristics section.</p>
	<p>Humidity limitation should be indicated adjacent to the upper and lower horizontal lines. NOTE: Values for "xx" and "yy" can be found in the Environmental Characteristics section.</p>
	<p>Atmospheric pressure limitation should be indicated adjacent to the upper and lower horizontal lines. NOTE: Values for "xx" and "yy" can be found in the Environmental Characteristics section.</p>
	<p>Indicates that the fee has been paid for the recovery of the packaging material in some European countries.</p>
	<p>Indicates that an object is capable of being recycled.</p>

Intended Use

MR2217 is an LCD display intended used for trained physician or practitioners viewing medical images and data in hospital or clinic environment.

The device is neither used for life supporting system, surgical procedure system nor viewing digital mammography images.

Warning

You may get an electric shock if the AC outlet is not grounded properly.

Disconnecting Device

The power cord is the disconnect device for this monitor and is attached to the power adapter as a plug-in device. To remove all electrical power from the monitor, disconnect the power cord from the electrical outlet.

General recommendations

- For continued safe use of this monitor, read the safety and operating instructions before operating the monitor.
- Unplug the AC mains cord to disconnect the mains power.
- Use only the power cord supplied with this monitor.
- Adhere to all warnings on the device and in the operating instructions manual.

Electrical Shock or Fire Hazard

- Connect the AC power cord to a properly grounded power source with the line frequency and voltage specified on the name plate of the power adapter.
- To reduce the risk of electrical shock, DO NOT remove any covers. Refer servicing to qualified personnel only.
- Users must not allow SIP/SOPs and the patient to come into contact at the same time.

Modifications to the unit

No modification of this monitor is allowed.

Type of protection (electrical)

Monitor with external power adapter: Class I equipment.

Explosion Hazard

Do not use this monitor in the presence of flammable materials.

Power connection - Monitor with external +19VDC power adapter

- Power requirements: The monitor must be powered using the accompanied medical- approved power adapter.
- The medical-approved power adapter must be powered by AC mains power.
- The power adapter is specified as a part of the monitor.

Power cord

- Do not use extension cords as this may result in fire or electric shock.
- Use the power cord that is supplied with the monitor only.

NOTE: Grounding reliability can only be achieved when the equipment is connected to an equivalent receptacle marked "Hospital Only" or "Hospital Grade".

Connection of External Equipment

- External equipment intended for connection to signal input/output or other connectors, shall comply with relevant UL/EN/IEC standard (e.g. UL/EN/IEC 60950 for IT equipment and UL/EN 60601-1/IEC 60601 series for medical electrical equipment).
- In addition, all such combinations -systems- shall comply with the standard IEC 60601-1-1, safety requirements for medical electrical systems.
- Equipment not complying with UL/EN/IEC 60601-1 shall be kept outside the patient environment, as defined in the standard.

Regulatory compliance information

INDICATION FOR USE

MR2217 is an LCD display intended used for trained physician or practitioners viewing medical images and data in hospital or clinic environment.

The device neither be used for life supporting system, surgical procedure system nor viewing digital mammography images.

FCC Information

Federal Communications Commission (FCC) Notice (U.S. Only) **WARNING:** This equipment has been tested and found to comply with the limits for a digital device, pursuant to Part 15 Class B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 Class B of the FCC rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

CANADIAN NOTICE

This ISM device complies with Canadian ICES-003. Cet appareil ISM est conforme à la norme NMB-003 du Canada.

EMC notice

Electromagnetic emissions

The MR2217 is intended for use in the electromagnetic environment specified below. The customer or the user of the MR2217 should assure that it is used in such an environment.

Emissions test	Compliance	Electromagnetic environment - Guidance
RF emissions CISPR 11	Group 1	The MR2217 uses RF energy only for its internal function. Therefore, its RF emissions are very low and are not likely to cause any interference in nearby electronic equipment.
RF emissions CISPR 11	Class B	The MR2217 is suitable for use in all establishments, including domestic establishments and those directly connected to the public low-voltage power supply network that supplies buildings used for domestic purposes.
Harmonic emissions IEC 61000-3-2	Class D	
Voltage fluctuations/ flicker emissions IEC 61000-3-3	Complies	

Electromagnetic immunity

Immunity test	IEC 60601 Test levels	Compliance level	Electromagnetic environment - Guidance
Electrostatic discharge (ESD) IEC 61000-4-2	±6 kV contact ±8 kV air	±6 kV contact ±8 kV air	Floors should be wood, concrete or ceramic tile. If floors are covered with synthetic material, the relative humidity should be at least 30%.
Electrical fast transient/burst IEC 61000-4-4	±2 kV for power supply lines ±1 kV for input/output lines	±2 kV for power supply lines ±1 kV for input/output lines	Mains power quality should be that of a typical commercial or hospital environment.
Surge IEC 61000-4-5	±1 kV line(s) to line(s) ±2 kV line(s) to earth	±1 kV line(s) to line(s) ±2 kV line(s) to earth	Mains power quality should be that of a typical commercial or hospital environment.

<p>Voltage dips, short interruptions and voltage variations on power supply input lines IEC 61000-4-11</p>	<p>< 5% U_T 1 (> 95% dip in U_T) for 0.5 cycle 40% U_T (60% dip in U_T) for 5 cycles 70% U_T (30% dip in U_T) for 25 cycles < 5% U_T (>95% dip in U_T) for 5s</p>	<p>< 5% U_T (> 95% dip in U_T) for 0.5 cycle 40% U_T (60% dip in U_T) for 5 cycles 70% U_T (30% dip in U_T) for 25 cycles < 5% U_T (>95% dip in U_T) for 5s</p>	<p>Mains power quality should be that of a typical commercial or hospital environment. If the user of the MR2217 requires continued operation during power mains interruptions, it is recommended that the MR2217 be powered from an uninterruptible power supply or a battery.</p>
<p>Power frequency (50/60 Hz) magnetic field IEC 61000-4-8</p>	<p>3 A/m</p>	<p>3 A/m</p>	<p>Power frequency magnetic fields should be at least characteristic of a typical location in a typical commercial or hospital environment.</p>
<p>Conducted RF IEC 61000-4-6 Radiated RF IEC 61000-4-3</p>	<p>3 Vrms 150 kHz to 80 MHz 3 V/m 80 MHz to 2.5 GHz</p>	<p>3 Vrms 3 V/m</p>	<p>Portable and mobile RF communications equipment should be used no closer to any part of the OE262H, including cables, than the recommended separation distance calculated from the equation appliance to the frequency of the transmitter. Recommended separation distance: $d = 1.2 \sqrt{P}$ $d = 1.2 \sqrt{P}$ 80 MHz to 800 MHz $d = 2.3 \sqrt{P}$ 800 MHz to 2.5 GHz Where P is the maximum output power rating of the transmitter in watts (W) according to the transmitter manufacturer and d is the recommended separation distance in meters (m). Field strengths from fixed RF transmitters, as determined by an electromagnetic site survey^a, should be less than the compliance level in each frequency range^b. Interference may occur in the vicinity of equipment marked with following symbol:</p> 

NOTE: At 80 MHz and 800 MHz, the higher frequency range applies.

NOTE: These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.

- a. Field strengths from fixed transmitters, such as base stations for radio (cellular/cordless) tele-phones and land mobile radios, amateur radio, AM and FM radio broadcast and TV broadcast cannot be predicted theoretically with accuracy. To assess the electromagnetic environment due to fixed RF transmitters, an electromagnetic site survey should be considered. If the measured field strength in the location in which the MR2217 is used exceeds the applicable RF compliance level above, the MR2217 should be observed to verify normal operation. If abnormal performance is observed, additional measures may be necessary, such as reorienting or relocating the MR2217.
- b. Over the frequency range 150 kHz to 80 MHz, field strengths should be less than 3 V/m.

Recommended separation distance

The MR2217 display is intended for use in an electromagnetic environment in which radiated RF disturbances are controlled. The customer of the user or the MR2217 display can help prevent electromagnetic interference by maintaining a minimum distance between portable and mobile RF communications equipment (transmitters) and the MR2217 display as recommended below, according to the maximum output power of the communications equipment.

Rated maximum output power of transmitter (W)	Separation distance according to frequency of transmitter (m)		
	150kHz to 80MHz $d=1.2\sqrt{P}$	80MHz to 800MHz $d=1.2\sqrt{P}$	800MHz to 2.5GHz $d=2.3\sqrt{P}$
0.01	0.12	0.12	0.23
0.1	0.38	0.38	0.73
1	1.2	1.2	2.3
10	3.8	3.8	7.3
100	12	12	23

For transmitters rated at a maximum output power not listed above, the recommended separation distance "d" in meters (m) can be estimated using the equation applicable to the frequency of the transmitter, where "P" is the maximum output power rating of the transmitter in watts (W) according to the transmitter manufacturer.

NOTE: At 80 MHz and 800 MHz, the separation distance for the higher frequency range applies.

NOTE: These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.

About Your Monitor

Package Contents

Your monitor ships with the components shown below. Ensure that you have received all the components and [Contact Dell](#) if something is missing.

 **NOTE:** Some items may be optional and may not ship with your monitor. Some features or media may not be available in certain countries.

 **NOTE:** To set up with any other stand, please refer to the respective stand setup guide for setup instructions.

	Monitor
	Stand Riser
	Stand Base
	Cable Cover

	<p>DC Power Cable</p>
	<p>Power Adapter</p>
	<p>DP Cable</p>
	<p>HDMI Cable</p>

	<ul style="list-style-type: none"> • Drivers and Documentation Media • Quick Setup Guide • Safety, Environmental, and Regulatory Information • Factory Calibration Report

Product Features

The **Dell MR2217** flat panel medical display has an active matrix, Thin-Film Transistor (TFT), Liquid Crystal Display (LCD) and LED backlight. The monitor features include:

- 54.61 cm (21.5-inch) viewable area display (measured diagonally). 1920 x 1080 resolution, plus full-screen support for lower resolutions.
- Wide viewing angle to allow viewing from a sitting or standing position, or while moving from side-to-side.
- Tilt, swivel, height, and rotate adjustment capabilities.
- Removable stand and Video Electronics Standards Association (VESA™) 100 mm mounting holes for flexible mounting solutions.
- Digital connectivity with DisplayPort and HDMI.
- Equipped with 1 USB upstream port and 2 USB downstream ports.
- Plug and play capability if supported by your system.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Software and documentation media includes an Information File (INF), Image Color Matching File (ICM), and product documentation.
- Dell Display Manager Software included (comes in the CD shipped with the monitor).
- Security lock slot and cable clip.
- Capability to switch from wide aspect to standard aspect ratio while maintaining the image quality.
- BFR/PVC/CFR-free (Halogen-free) excluding the external cables and power adapter.
- Meets NFPA 99 leakage current requirements.
- Arsenic-Free glass and Mercury-Free for the panel only.
- 0.5 W standby power when in the sleep mode.
- Energy Gauge shows the energy level being consumed by the monitor in real time.
- Analog backlight dimming control for flicker free display.
- DICOM (Digital Imaging and Communications in Medicine) part-14 GFDS for accurate grayscale reproducibility. DICOM calibrated luminance at 180 cd/m².
- FDA Class I and medical grade display.
- Integrated backlight sensing for brightness stabilization.
- Cable security and management.
- 10-bit LUT and color processing.
- White housing for visible dried blood stains detection.

Identifying Parts and Controls

Front View

Front panel controls

Label	Description
1	Function buttons (For more information, see Operating the Monitor)
2	Power On/Off button (with LED indicator)

Side View

Back View

Back view with monitor stand

Label	Description	Use
1	VESA mounting holes (100 mm x 100 mm - behind attached VESA Cover)	Wall mount monitor using VESA-compatible wall mount kit (100 mm x 100 mm).
2	Regulatory label	Lists the regulatory approvals.
3	Stand release button	Releases stand from monitor.
4	Security lock slot	Supports the use of security lock to prevent theft. (security lock not included)
5	Cable cover	Offers the protection to the installed cables on the rear of the monitor.
6	Barcode serial number label	Refer to this label if you need to contact Dell for technical support.
7	Cable clip	Use to secure the cables by tightening the screw on the clip.
8	Cable management slot	Use to organize cables by placing them through the slot.

Bottom View

Bottom view without monitor stand

Label	Description	Use
1	Adapter connector	Connect the power cable.
2	DisplayPort in connector	Connect your computer with DP cable.
3	HDMI port connector	Connect your computer with HDMI cable.
4	VGA connector	Connect your computer with VGA cable (cable not included).
5	USB upstream port	Connect the USB cable that came with your monitor to the monitor and the computer. Once this cable is connected, you can use the USB connectors on the monitor.
6	USB downstream port	Connect your USB device. You can only use this connector after you have connected the USB cable to the computer and USB upstream connector on the monitor.
7	Stand release button	Releases stand from monitor.

Monitor Specifications

Flat Panel Specifications

Model	MR2217
Screen type	Active matrix - TFT LCD
Panel type	In-Plane Switching type
Viewable image	
Diagonal	546.1 mm (21.5 inches)
Horizontal, Active Area	476.06 mm (18.74 inches)
Vertical, Active Area	267.78 mm (10.54 inches)
Area	127479.35 mm ² (197.59 inch ²)
Pixel pitch	0.248 mm x 0.248 mm
Viewing angle	178° (vertical) typical 178° (horizontal) typical
Luminance output	250 cd/m ² (typical)
Contrast ratio	1000 to 1 (typical)
Faceplate coating	Anti-Glare with 3H hardness
Backlight	LED edgelight system
Response time	14 ms (Gray to Gray)
Color depth	16.7 million colors
Color gamut	72% (typical)*

* MR2217 color gamut (typical) is based on CIE1976 (85%) and CIE1931 (72%) test standards.

Resolution Specifications

Model	MR2217
Horizontal scan range	30 kHz to 83 kHz (automatic)
Vertical scan range	50 Hz to 76 Hz (automatic)
Maximum preset resolution	1920 x 1080 at 60 Hz

Preset Display Modes

Display Mode	Horizontal Frequency (kHz)	Vertical Frequency (Hz)	Pixel Clock (MHz)	Sync Polarity (Horizontal/Vertical)
VESA, 720 x 400	31.5	70.1	28.3	-/+
VESA, 640 x 480	31.5	60.0	25.2	-/-
VESA, 640 x 480	37.5	75.0	31.5	-/-
VESA, 800 x 600	37.9	60.3	40.0	+/+
VESA, 800 x 600	46.9	75.0	49.5	+/+

Non-operating	<ul style="list-style-type: none"> Storage: 5% to 90% (non-condensing) Shipping: 5% to 90% (non-condensing)
Altitude	
Operating	3,000 m (9,842 ft) (maximum)
Non-operating	12,192 m (40,000 ft) (maximum)
Thermal dissipation	<ul style="list-style-type: none"> 102.36 BTU/hour (maximum) 68.24 BTU/hour (typical)

Regulatory Compliance

Certification	MR2217
	FDA Class I, ANSI/AAMI ES 60601-1, CAN/CSAC22.2 No. 60601-1, FCC Part 15 Class B, ICES-003 Level B, IEC/EN 60601-1, IEC/EN 60601-1-2

Power Management Modes

If you have VESA's DPMTM compliance display card or software installed in your PC, the monitor can automatically reduce its power consumption when not in use. This is referred to as *Power Save Mode**. If the computer detects input from the keyboard, mouse, or other input devices, the monitor automatically resumes functioning. The following table shows the power consumption and signaling of this automatic power saving feature.

VESA Modes	Horizontal Sync	Vertical Sync	Video	Power Indicator	Power Consumption
Normal operation	Active	Active	Active	Green	30 W (maximum)** 20 W (typical)
Active-off mode	Inactive	Inactive	Blanked	Amber	Less than 0.5 W
Switch off	-	-	-	Amber	Less than 0.5 W

* Zero power consumption in OFF mode can only be achieved by disconnecting the main cable from the monitor.

** Maximum power consumption with max luminance, and USB active.

The OSD functions only in the normal operation mode. When any button is pressed in the Active-off mode, the following message will be displayed:

NOTE: The message may be slightly different according to the connected input signal.

Activate the computer and the monitor to gain access to the OSD.

Plug and Play Capability

You can install the monitor in any Plug and Play-compatible system. The monitor automatically provides the computer system with its Extended Display Identification Data (EDID) using Display Data Channel (DDC) protocols so the system can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings if desired. For more information about changing the monitor settings, see [Operating the Monitor](#).

Universal Serial Bus (USB) Interface

This section gives you information about the USB ports that are available on the monitor.

NOTE: This monitor is High-Speed USB 2.0 compatible.

Transfer Speed	Data Rate	Power Consumption*
High speed	480 Mbps	2.5 W (Max, each port)
Full speed	12 Mbps	2.5 W (Max, each port)
Low speed	1.5 Mbps	2.5 W (Max, each port)

USB Upstream Connector

Pin Number	4-pin Side of the Connector
1	DMU
2	VCC
3	DPU
4	GND

USB Downstream Connector

Pin Number	4-pin Side of the Connector
1	VCC
2	DMD
3	DPD
4	GND

USB Ports

- 1 upstream - bottom
- 2 downstream - bottom

NOTE: USB 2.0 functionality requires a USB 2.0-capable computer.

NOTE: The monitor's USB interface works only when the monitor is On or in the power save mode. If you turn Off the monitor and then turn it On, the attached peripherals may take a few seconds to resume normal functionality.

LCD Monitor Quality and Pixel Policy

During the LCD Monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: <http://www.dell.com/support/monitors>.

Cleaning Your Monitor

CAUTION: Read and follow the [Safety Instructions](#) before cleaning the monitor.

CAUTION: Do not pour or spray any liquid directly on the device or permit fluid to seep into connections or openings.

WARNING: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

For best practices, follow the instructions in the list below while unpacking, cleaning, or handling your monitor:

External Plastic surface

- For cleaning and disinfecting the plastic surface of the monitor, wipe the surface with a soft lint-free, lightly moistened cloth with up to 75% concentrated ethyl alcohol solution. Do not use strong alkali, strong solvents, acid and abrasive cleaning tools such as steel wool, steel blades and sponge with abrasives for cleaning to prevent damage and scratches to the monitor surface.
- Wipe off cleaning solutions with a clean and dry lint-free cloth if necessary.

Monitor Panel surface

- If the surface of the panel becomes dusty, wipe gently with absorbent cotton with water, non-alcohol monitor wipes or other soft materials like chamois soaks with petroleum benzene.
- **Do not use** alcohol or ammonia (household cleaners/wipes) on the monitor panel surface as it will cause damage to the polarizer.

Setting Up the Monitor

 **WARNING:** Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

 **WARNING:** The monitor is to be set up only by qualified personnel.

The following sections provide information about connecting your monitor to the computer. Please read carefully and follow the instructions given below to complete the monitor setup.

Connecting Your Monitor

 **NOTE:** If your computer is turned on, turn it Off and disconnect the power cable before you start the following procedures.

- 1 Remove the monitor protective cover and place the monitor with its front facing downward on it.

- 2 Use a Phillips crosshead screwdriver to loose the screw securing the cable clip.

3 Open the cable clip, as illustrated in the figure below.

4 Connect the necessary cables to the monitor.

- a DC power cable
- b DP cable
- c HDMI cable
- d VGA cable (optional, cable not included)
- e USB upstream cable
- f USB downstream cables (optional, cable not included)

NOTE: Do not connect all cables to the computer at the same time.

NOTE: Route each cable neatly and properly as shown in the illustration.

NOTE: Ensure that the cables are placed in a balanced arrangement.

- 5 Tighten the cable clip screw with a Phillips crosshead screwdriver to secure all the connected cables.

WARNING: Do not plug-in or turn-on the power to the monitor until you are instructed to do so.

NOTE: Read and follow the procedures in the following sections to continue setting up the monitor.

Attaching the Cable Cover

NOTE: The cable cover is detached when the monitor is shipped from the factory.

WARNING: Before turning on the power to the monitor, make sure the cable cover is well attached.

- 1 Fit the three tabs on the upper part of the cable cover to the groove on the back of the monitor.
- 2 Press the cable cover till it snaps into place.

Attaching the Stand

-  **NOTE:** The stand is detached when the monitor is shipped from the factory.
-  **NOTE:** This is applicable for a monitor with a stand. When any other stand is bought, please refer to the respective stand setup guide for the set up instructions.
-  **WARNING:** Do not plug-in or turn-on the power to the monitor until you are instructed to do so.

To attach the monitor stand:

- 1 Insert the two tabs on the upper part of the stand to the groove on the back of the monitor.
- 2 Press the stand till it snaps into place.

- 3 Hold the stand base with the triangle mark, ▲, facing upward. Then, align the stand base protruded blocks to the matching slot on the stand.

- 4 Insert the stand base blocks fully into the stand slot.

- 5 Lift the screw handle and turn the screw clockwise.

- 6 After fully tighten the screw, fold the screw handle flat within the recess.

Organizing Your Cables

After attaching all necessary cables (see [Organizing Your Cables](#)), the cable cover (see [Attaching the Cable Cover](#)), and the monitor stand (see [Attaching the Stand](#)), organize all cables as shown above.

Connecting the Computer

To connect the monitor to your computer:

 **NOTE:** See also [Connecting Your Monitor](#).

- 1 Plug the other end of the connected VGA or DP or HDMI cable to your computer.
- 2 Plug the USB upstream cable to an appropriate USB 2.0 port on your computer.
- 3 Connect the USB 2.0 peripherals to the downstream USB 2.0 ports on the monitor.
- 4 Plug the power cables for your computer and monitor into a nearby outlet.
- 5 Turn On the monitor and the computer.

CAUTION: The graphics are used for the purpose of illustration only. Appearance of the computer may vary.

Removing the Monitor Stand

-  **NOTE:** To prevent scratches on the LCD screen while removing the stand, ensure that the monitor is placed on a soft, clean surface.
-  **NOTE:** This is applicable for a monitor with a stand. When any other stand is bought, please refer to the respective stand setup guide for the set-up instructions.

To remove the stand:

- 1 Place the monitor on a soft cloth or cushion.
- 2 Press and hold the stand release button.
- 3 Lift the stand up and away from the monitor.

Removing the Cable Cover

- 1 Place both of your thumbs on the two sides of the cable cover, as illustrated.
- 2 Slide the cable cover downward to remove it from the monitor.

Wall Mounting (Optional)

(Screw dimension: M4 x 10 mm).

Refer to the instructions that come with the VESA-compatible wall mounting kit.

- 1 Place the monitor panel on a soft cloth or cushion on a stable, flat table.
- 2 Remove the stand.
- 3 Use a Phillips crosshead screwdriver to remove the four screws securing the plastic cover.
- 4 Attach the mounting bracket from the wall mounting kit to the monitor.
- 5 Mount the monitor on the wall by following the instructions that comes with the wall mounting kit.

NOTE: For use only with UL-listed wall mount bracket with minimum weight/load bearing capacity of 10.8 kg.

Operating the Monitor

Power On the Monitor

 **WARNING:** Always make sure your hands are dry when operating the monitor.

Press the Power button to turn On the monitor.

Using the Front Panel Controls

Use the control buttons on the front of the monitor to adjust the characteristics of the image being displayed. As you use these buttons to adjust the controls, an OSD shows the numeric values of the characteristics as they change.

The following table describes the front panel buttons:

Front Panel Button	Description
1  Shortcut key/ Preset Modes	Use this button to choose from a list of preset color modes.

2		Use this button to directly access the Brightness/Contrast menu.
	Shortcut key/ Brightness/Contrast	
3		Use the MENU button to launch the On-Screen Display (OSD) and select the OSD Menu. See Accessing the Menu System .
4		Use this button to go back to the main menu or exit the OSD main menu.
	Exit	
5		Use the Power button to turn the monitor On and Off . The green light indicates the monitor is On and fully functional. An amber light indicates the power save mode.
	Power (with power light indicator)	

Front Panel Button

Use the buttons on the front of the monitor to adjust the image settings.

Front Panel Button	Description
1  Up	Use the Up button to adjust (increase ranges) items in the OSD menu.
2  Down	Use the Down button to adjust (decrease ranges) items in the OSD menu.
3  OK	Use the OK button to confirm your selection.
4  Back	Use the Back button to go back to the previous menu.

Using the On-Screen Display (OSD) Menu

Accessing the Menu System

 **NOTE:** If you change the settings and then either proceed to another menu or exit the OSD menu, the monitor automatically saves those changes. The changes are also saved if you change the settings and then wait for the OSD menu to disappear.

- 1 Press the  button to launch the OSD menu and display the main menu.

Main Menu for analog (VGA) input

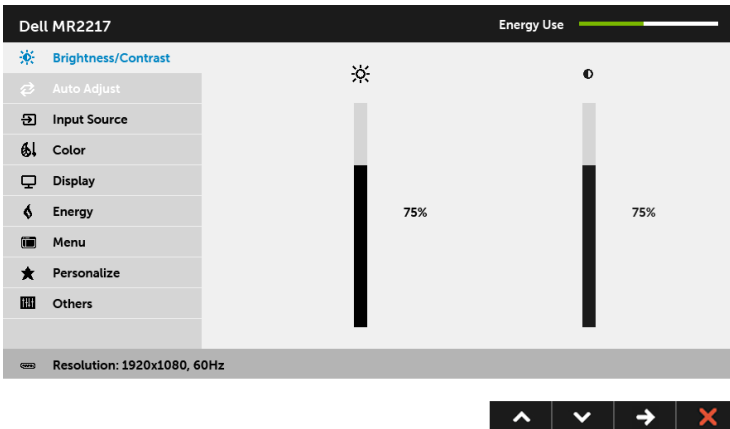

OR

Main Menu for digital (HDMI) input

OR

Main Menu for digital (DP) input

NOTE: Auto Adjust is only available when you use the analog (VGA) connector.

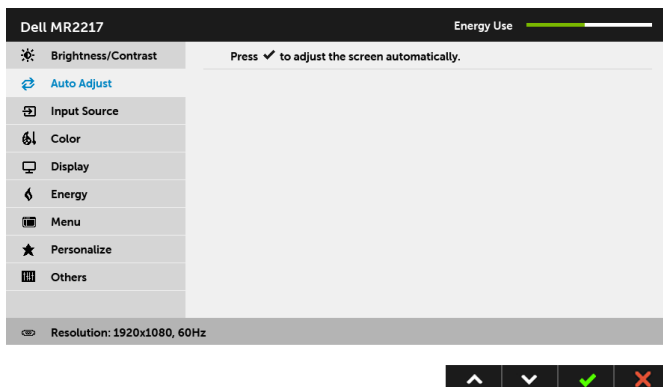

- 2 Press the  and  buttons to move between the setting options. As you move from one icon to another, the option name is highlighted. See the following table for a complete list of all the options available for the monitor.
- 3 Press the  button once to activate the highlighted option.
- 4 Press  and  button to select the desired parameter.
- 5 Select the  button to return to the main menu.

Icon	Menu and Submenus	Description
	Brightness/Contrast	Use this menu to activate Brightness/Contrast adjustment.
		
		NOTE: Press  to switch between the options.
	Brightness	Brightness adjusts the luminance of the backlight. Press the  button to increase the brightness and press the  button to decrease the brightness (min. 0 / max. 100).
	Contrast	Adjust the Brightness first, and then adjust the Contrast only if further adjustment is necessary. Press the  button to increase the contrast and press the  button to decrease the contrast (min. 0 / max. 100). The Contrast function adjusts the degree of difference between darkness and lightness on the monitor screen. NOTE: Contrast is grayed out in DICOM mode to maintain grayscale accuracy.

Auto Adjust

Even though your computer recognizes your monitor on startup, the **Auto Adjustment** function optimizes the display settings for use with your particular setup.

Auto Adjustment allows the monitor to self-adjust to the incoming video signal. After using **Auto Adjustment**, you can further tune your monitor by using the **Pixel Clock** (Coarse) and **Phase** (Fine) controls under **Display** settings.

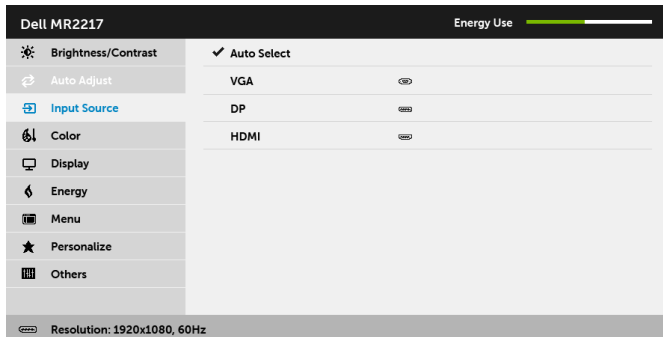

NOTE: In most cases, **Auto Adjust** produces the best image for your configuration.

NOTE: **Auto Adjust** option is only available when you are using the analog (VGA) connector.

Input Source

Use the **Input Source** menu to select between the different video signals that may be connected to your monitor.

Auto Select

Press to select **Auto Select**, the monitor scans for available input sources.

VGA

Select the **VGA** input when you are using the analog (VGA) connector. Press to select the VGA input source.

DP

Select the **DP** input when you are using the DisplayPort (DP) connector. Press to select the DisplayPort input source.

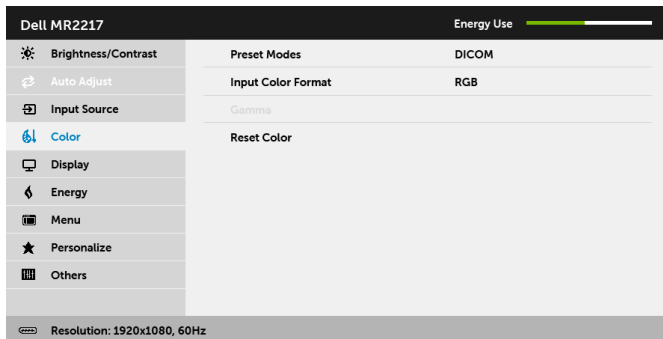

HDMI

Select the **HDMI** input when you are using the HDMI connector. Press to select the HDMI input source.

Color

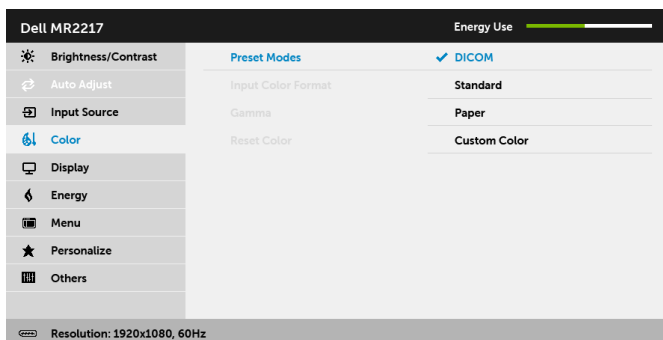

Use **Color** to adjust the color setting mode.

Preset Modes When you select **Preset Modes**, you can choose **DICOM**, **Standard**, **Paper**, or **Custom Color** from the list.

- **DICOM**: Provides consistent luminance uniformity and on diverse displays with consistent methodology. This is the default preset mode.
- **Standard**: Loads the monitor's default color settings.
- **Paper**: Loads brightness and sharpness settings ideal for viewing text. Blend the text background to simulate paper media without affecting color images. Applies to RGB input format only.
- **Custom Color**: Allows you to manually adjust the color settings.

Press the  and  buttons to adjust the three colors (R, G, B) values and create your own preset color mode.

Input Color Format

Allows you to set the video input mode to:

RGB: Select this option if your monitor is connected to a computer (or DVD player) using the DP or HDMI cable.

YPbPr: Select this option if your DVD player supports only YPbPr output.

Gamma

Allows you to set the **Gamma** to **PC** or **MAC**.

NOTE: This option is not available when the **Preset Modes** is **DICOM**.

Reset Color

Reset your monitor color settings to the factory settings.

Display

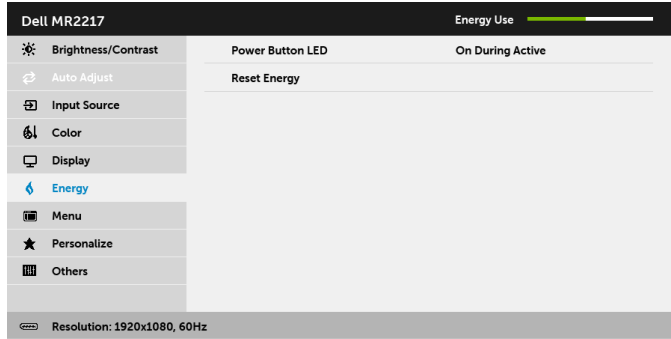

Use **Display** to adjust image.

Aspect Ratio	Adjusts the image ratio to Wide 16:9 , 4:3 , or 5:4 .
Brightness Stabilization	Activating this feature to maintain stable brightness level and shorten cold startup time. NOTE: This option is only available when the Preset Modes is DICOM or Standard .
Monitor Sleep	Allows you to let the monitor turn off automatically or stay on when your computer goes into sleep mode. When Sleep After Timeout is selected, the monitor goes to sleep as the system sleeps; when Never is selected, you may prevent the screen from going off as the system sleeps for speedy display recovery from PC wake up.
Horizontal Position	Use  or  to adjust the image left or right. Minimum is '0' (-). Maximum is '100' (+).
Vertical Position	Use  or  to adjust the image up or down. Minimum is '0' (-). Maximum is '100' (+). NOTE: Horizontal Position and Vertical Position adjustments are only available for "VGA" input.
Sharpness	This feature can make the image look sharper or softer. Use  or  to adjust the sharpness from '0' to '100'.
Pixel Clock	The Phase and Pixel Clock adjustments allow you to adjust your monitor to your preference. Use  or  to adjust for best image quality.
Phase	If satisfactory results are not obtained using the Phase adjustment, use the Pixel Clock (coarse) adjustment and then use Phase (fine), again. NOTE: Pixel Clock and Phase adjustments are only available for "VGA" input.
Reset Display	Select this option to restore default display settings.

Energy

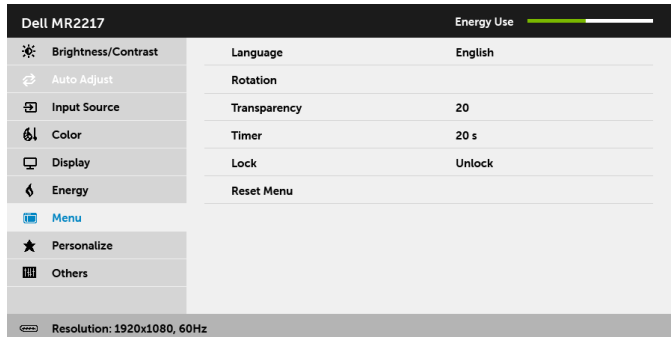

Power Button LED Allows you to set the power LED indicator On or Off to save energy.

Reset Energy Select this option to restore default **Energy** settings.

Menu

Select this option to adjust the settings of the OSD, such as, the languages of the OSD, the amount of time the menu remains on screen, and so on.

Language **Language** options set the OSD display to one of the three languages (English, Spanish, and French).

Rotation Rotates the OSD by 90 degrees counter-clockwise. You can adjust the menu according to your [Display Rotation](#).

Transparency Select this option to change the menu transparency by pressing the and buttons (min. 0 / max. 100).

Timer

Allows you to set the time for which the OSD remains active after you press a button on the monitor.

Use or to adjust the slider in 1 second increments, from 5 to 60 seconds.

Lock

Controls user access to adjustments. When **Lock** is selected, no user adjustments are allowed. All buttons are locked.

NOTE:

Unlock function– Only hard unlock (press and hold the button above the power button for 6 seconds).

Lock function – Either soft lock (through the OSD menu) or hard lock (press and hold the button above the power button for 6 seconds).

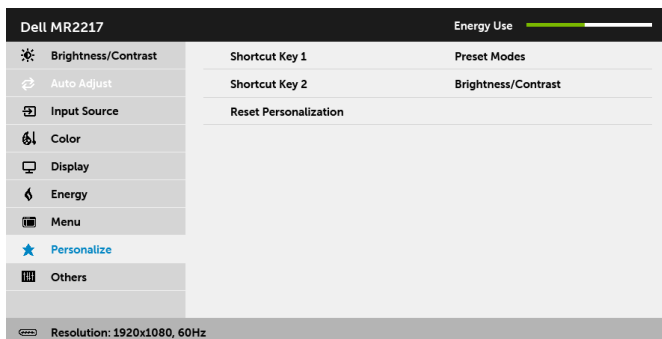

Reset Menu

Reset all OSD settings to the factory preset values.

Personalize

Users can choose a feature from **Preset Modes**, **Brightness/Contrast**, **Auto Adjust**, **Input Source**, **Aspect Ratio**, or **Rotation** and set it as a shortcut key.

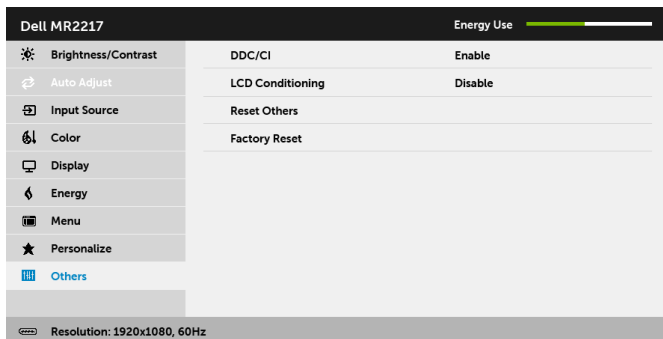

Reset Personalization

Restores shortcut keys to factory defaults.

Others

Select this option to adjust the OSD settings, such as the **DDC/CI**, **LCD Conditioning**, and so on.

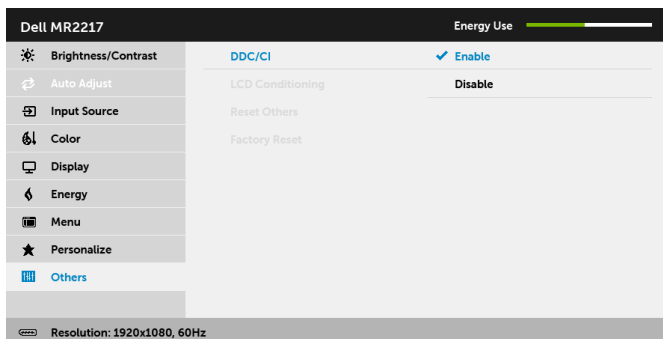

DDC/CI

DDC/CI (Display Data Channel/Command Interface) allows your monitor parameters (brightness, color balance, and etc.) to be adjustable via the software on your computer.

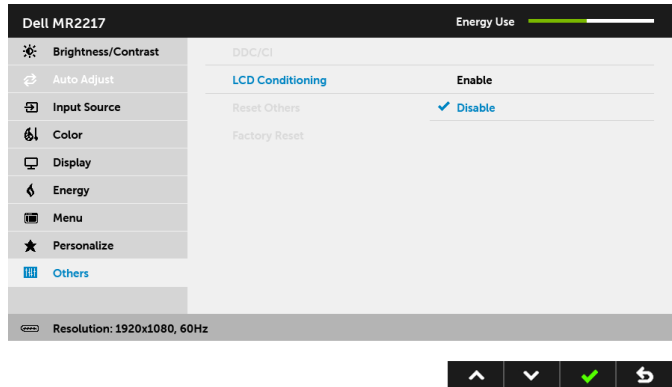

You can disable this feature by selecting **Disable**.

Enable this feature for best user experience and optimum performance of your monitor.

LCD Conditioning

Helps reduce minor cases of image retention. Depending on the degree of image retention, the program may take some time to run. You can enable this feature by selecting **Enable**.

Reset Others Reset all settings under the **Others** menu to the factory preset values.

Factory Reset Reset all settings to the factory preset values.

NOTE: This monitor has a built-in feature to automatically calibrate the brightness to compensate for LED aging.

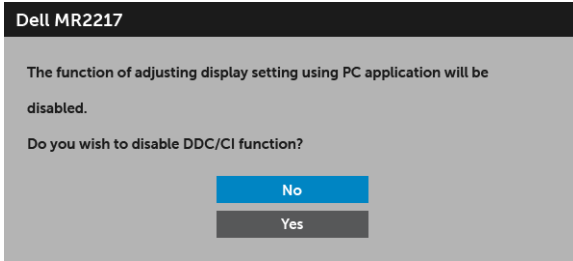

OSD Warning Messages

When the monitor does not support a particular resolution mode, you will see the following message:

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See [Monitor Specifications](#) for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is 1920 x 1080.

You will see the following message before the DDC/CI function is disabled:

When the monitor enters the **Power Save** mode, the following message appears:

Activate the computer and wake up the monitor to gain access to the [OSD](#).

If you press any button other than the power button, the following message will appear depending on the selected input:

NOTE: The message may be slightly different according to the connected input signal.

If either VGA, HDMI, or DP input is selected and the corresponding cable is not connected, a floating dialog box as shown below appears.

OR

OR

See [Troubleshooting](#) for more information.

Use only the supplied power adapter to connect to this monitor and AC mains. Using adapter other than the one supplied may cause malfunction and damage to the monitor, the following error message will appear:

Setting the Maximum Resolution

To set the maximum resolution for the monitor:

In Windows[®] 7, Windows[®] 8, and Windows[®] 8.1:

- 1 For Windows[®] 8 and Windows[®] 8.1 only, select the Desktop tile to switch to classic desktop.
- 2 Right-click on the desktop and click **Screen Resolution**.
- 3 Click the Dropdown list of the Screen Resolution and select **1920 x 1080**.
- 4 Click **OK**.

In Windows[®] 10:

- 1 Right-click on the desktop and click **Display settings**.
- 2 Click **Advanced display settings**.
- 3 Click the dropdown list of **Resolution** and select **1920 x 1080**.
- 4 Click **Apply**.

If you do not see 1920 x 1080 as an option, you may need to update your graphics driver. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or portable computer:

- Go to <http://www.dell.com/support>, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (portable or desktop):

- Go to the support site for your computer and download the latest graphic drivers.
- Go to your graphics card website and download the latest graphic drivers.

Using the Tilt, Swivel, and Vertical Extension

NOTE: This is applicable for a monitor with a stand. When any other stand is bought, please refer to the respective stand setup guide for set up instructions.

Tilt, Swivel

With the stand attached to the monitor, you can tilt and swivel the monitor for the most comfortable viewing angle.

NOTE: The stand is detached when the monitor is shipped from the factory.

Vertical Extension

NOTE: The stand extends vertically up to 130 mm. The figure below illustrates how to extend the stand vertically.

Rotating the Monitor

Before you rotate the monitor, your monitor should be fully vertically extended ([Vertical Extension](#)) and fully tilted up to avoid hitting the bottom edge of the monitor.

Rotate clockwise

Rotate counterclockwise

-  **NOTE:** To use the Display Rotation function (Landscape versus Portrait view) with your Dell computer, you require an updated graphics driver that is not included with this monitor. To download the graphics driver, go to www.dell.com/support and see the **Download** section for **Video Drivers** for latest driver updates.
-  **NOTE:** When in the *Portrait View Mode*, you may experience performance degradation in graphic-intensive applications (3D Gaming and etc.).

Adjusting the Rotation Display Settings of Your System

After you have rotated your monitor, you need to complete the procedure below to adjust the Rotation Display Settings of your system.

 **NOTE:** If you are using the monitor with a non-Dell computer, you need to go the graphics driver website or your computer manufacturer website for information on rotating the 'contents' on your display.

To adjust the Rotation Display Settings:

- 1 Right-click on the desktop and click **Properties**.
- 2 Select the **Settings** tab and click **Advanced**.
- 3 If you have an ATI graphics card, select the **Rotation** tab and set the preferred rotation.
- 4 If you have an nVidia graphics card, click the **nVidia** tab, in the left-hand column select **NVRotate**, and then select the preferred rotation.
- 5 If you have an Intel® graphics card, select the **Intel** graphics tab, click **Graphic Properties**, select the **Rotation** tab, and then set the preferred rotation.

 **NOTE:** If you do not see the rotation option or it is not working correctly, go to www.dell.com/support and download the latest driver for your graphics card.

Troubleshooting

WARNING: Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

Self-Test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

- 1 Turn off both your computer and the monitor.
- 2 Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove all digital cables from the back of computer.
- 3 Turn on the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains green. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

OR

OR

- 4 This box also appears during normal system operation, if the video cable becomes disconnected or damaged.
- 5 Turn Off your monitor and reconnect the video cable; then turn On both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in Diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

NOTE: You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in *self-test mode*.

To run the built-in diagnostics:

- 1 Ensure that the screen is clean (no dust particles on the surface of the screen).
- 2 Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.
- 3 Press and hold **Button 1** and **Button 4** on the front panel simultaneously for 2 seconds. A gray screen appears.
- 4 Carefully inspect the screen for abnormalities.
- 5 Press **Button 4** on the front panel again. The color of the screen changes to red.
- 6 Inspect the display for any abnormalities.
- 7 Repeat steps 5 and 6 to inspect the display in red, green, blue, black, white and text screens.

The test is complete when the text screen appears. To exit, press **Button 4** again.

If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions:

Common Symptoms	What You Experience	Possible Solutions
No Video/Power LED off	No picture	<ul style="list-style-type: none">• Ensure that the video cable connecting the monitor and the computer is properly connected and secure.• Verify that the power outlet is functioning properly using any other electrical equipment.• Ensure that the power button is pressed fully.• Ensure that the correct input source is selected in the Input Source menu.
No Video/Power LED on	No picture or no brightness	<ul style="list-style-type: none">• Increase brightness & contrast controls via OSD.• Perform monitor self-test feature check.• Check for bent or broken pins in the video cable connector.• Run the built-in diagnostics.• Ensure that the correct input source is selected in the Input Source menu.
Poor Focus	Picture is fuzzy, blurry, or ghosting	<ul style="list-style-type: none">• Perform Auto Adjust via OSD.• Adjust the Phase and Pixel Clock controls via OSD.• Eliminate video extension cables.• Reset the monitor to factory settings.• Change the video resolution to the correct aspect ratio.
Shaky/Jittery Video	Wavy picture or fine movement	<ul style="list-style-type: none">• Perform Auto Adjust via OSD.• Adjust the Phase and Pixel Clock controls via OSD.• Reset the monitor to factory settings.• Check environmental factors.• Relocate the monitor and test in another room.
Missing Pixels	LCD screen has spots	<ul style="list-style-type: none">• Cycle power On-Off.• Pixel that is permanently Off is a natural defect that can occur in LCD technology.• For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: http://www.dell.com/support/monitors.
Stuck-on Pixels	LCD screen has bright spots	<ul style="list-style-type: none">• Cycle power On-Off.• Pixel that is permanently off is a natural defect that can occur in LCD technology.• For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: http://www.dell.com/support/monitors.

Brightness Problems	Picture too dim or too bright	<ul style="list-style-type: none"> Reset the monitor to factory settings. Perform Auto Adjust via OSD. Adjust brightness & contrast controls via OSD.
Geometric Distortion	Screen not centered correctly	<ul style="list-style-type: none"> Reset the monitor to factory settings. Perform Auto Adjust via OSD. Adjust horizontal & vertical controls via OSD. <p>NOTE: When using HDMI/DisplayPort input, the positioning adjustments are not available.</p>
Horizontal/Vertical Lines	Screen has one or more lines	<ul style="list-style-type: none"> Reset the monitor to factory settings. Perform Auto Adjust via OSD. Adjust the Phase and Pixel Clock controls via OSD. Perform monitor self-test feature check and determine if these lines are also in self-test mode. Check for bent or broken pins in the video cable connector. Run the built-in diagnostics. <p>NOTE: When using HDMI/DisplayPort input, the Pixel Clock and Phase adjustments are not available.</p>
Synchronization Problems	Screen is scrambled or appears torn	<ul style="list-style-type: none"> Reset the monitor to factory settings. Perform Auto Adjust via OSD. Adjust the Phase and Pixel Clock controls via OSD. Perform monitor self-test feature check to determine if the scrambled screen appears in self-test mode. Check for bent or broken pins in the video cable connector. Restart the computer in the <i>safe mode</i>.
Safety Related Issues	Visible signs of smoke or sparks	<ul style="list-style-type: none"> Do not perform any troubleshooting steps. Contact Dell immediately.
Intermittent Problems	Monitor malfunctions on & off	<ul style="list-style-type: none"> Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. Reset the monitor to factory settings. Perform monitor self-test feature check to determine if the intermittent problem occurs in self-test mode.
Missing Color	Picture missing color	<ul style="list-style-type: none"> Perform monitor self-test feature check. Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. Check for bent or broken pins in the video cable connector.
Wrong Color	Picture color not good	<ul style="list-style-type: none"> Change the settings of the Preset Modes in the Color menu OSD depending on the application. Adjust R/G/B value under Custom Color in Color menu OSD. Change the Input Color Format to PC RGB or YPbPr in the Color menu OSD. Run the built-in diagnostics.

Image retention from a static image left on the monitor for a long period of time	Faint shadow from the static image displayed appears on the screen	<ul style="list-style-type: none"> • Use the Power Management feature to turn off the monitor at all times when not in use (for more information, see Power Management Modes). • Alternatively, use a dynamically changing screensaver.
---	--	---

Product Specific Problems

Specific Symptoms	What You Experience	Possible Solutions
Screen image is too small	Image is centered on screen, but does not fill entire viewing area	<ul style="list-style-type: none"> • Check the Aspect Ratio setting in the Display menu OSD. • Reset the monitor to factory settings.
Cannot adjust the monitor with the buttons on the front panel	OSD does not appear on the screen	<ul style="list-style-type: none"> • Turn Off the monitor, unplug the power cord, plug it back, and then turn On the monitor. • Check whether the OSD menu is locked. If yes, press and hold the button above the Power button for 6 seconds to unlock (for more information, see Lock).
No Input Signal when user controls are pressed	No picture, the LED light is breathing amber	<ul style="list-style-type: none"> • Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard. • Check whether the signal cable is plugged in properly. Re-plug the signal cable if necessary. • Reset the computer or video player.
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	<ul style="list-style-type: none"> • Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen. • Run the built-in diagnostics.

NOTE: When choosing HDMI/DP mode, the **Auto Adjust** function will not be available.

Universal Serial Bus (USB) Specific Problems

Specific Symptoms	What You Experience	Possible Solutions
USB interface is not working	USB peripherals are not working	<ul style="list-style-type: none">• Check that your monitor is turned On.• Reconnect the upstream cable to your computer.• Reconnect the USB peripherals (downstream connector).• Switch Off and then turn On the monitor again.• Reboot the computer.• Some USB devices like external portable HDD require higher electric current; connect the device directly to the computer system.
High Speed USB 2.0 interface is slow	High Speed USB 2.0 peripherals working slowly or not working at all	<ul style="list-style-type: none">• Check that your computer is USB 2.0-capable.• Some computers have both USB 2.0 and USB 1.1 ports. Ensure that the correct USB port is used.• Reconnect the upstream cable to your computer.• Reconnect the USB peripherals (downstream connector).• Reboot the computer.

Contact Dell

For customers in the United States, call **800-WWW-DELL (800-999-3355)**.

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Setting Up Your Monitor

Setting the display resolution

For maximum display performance with Microsoft® Windows® operating systems, set the display resolution to **1920 x 1080** pixels by performing the following steps:

In Windows® 7, Windows® 8, and Windows® 8.1:

- 1 For Windows® 8 and Windows® 8.1 only, select the Desktop tile to switch to classic desktop.
- 2 Right-click on the desktop and click **Screen Resolution**.
- 3 Click the Dropdown list of the Screen Resolution and select **1920 x 1080**.
- 4 Click **OK**.

In Windows® 10:

- 1 Right-click on the desktop and click **Display settings**.
- 2 Click **Advanced display settings**.
- 3 Click the dropdown list of **Resolution** and select **1920 x 1080**.
- 4 Click **Apply**.

If you do not see the recommended resolution as an option, you may need to update your graphics driver. Please choose the scenario below that best describes the computer system you are using, and follow the given steps.

If you have a Dell™ desktop or a Dell™ portable computer with internet access

- 1 Go to **www.dell.com/support**, enter your service tag, and download the latest driver for your graphics card.
- 2 After installing the drivers for your graphics adapter, attempt to set the resolution to **1920 x 1080** again.

NOTE: If you are unable to set the resolution to 1920 x 1080, please contact Dell™ to inquire about a graphics adapter that supports these resolutions.

If you have a non Dell™ desktop, portable computer, or graphics card

In Windows® 7, Windows® 8, and Windows® 8.1:

- 1 For Windows® 8 and Windows® 8.1 only, select the Desktop tile to switch to classic desktop.
- 2 Right-click on the desktop and click **Personalization**.
- 3 Click **Change Display Settings**.
- 4 Click **Advanced Settings**.
- 5 Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).
- 6 Refer to the graphic card provider website for updated driver (for example, <http://www.ATI.com> OR <http://www.NVIDIA.com>).
- 7 After installing the drivers for your graphics adapter, attempt to set the resolution to **1920 x 1080** again.

In Windows® 10:

- 1 Right-click on the desktop and click **Display settings**.
- 2 Click **Advanced display settings**.
- 3 Click the dropdown list of **Resolution** and select **1920 x 1080**.
- 4 Identify your graphics controller supplier from the description at the top of the window (e.g. NVIDIA, ATI, Intel etc.).
- 5 Refer to the graphic card provider website for updated driver (for example, <http://www.ATI.com> OR <http://www.NVIDIA.com>).
- 6 After installing the drivers for your graphics adapter, attempt to set the resolution to **1920 x 1080** again.

NOTE: If you are unable to set the recommended resolution, please contact the manufacturer of your computer or consider purchasing a graphics adapter that will support the video resolution.
