

# DM14

## Floor-standing loudspeaker system

### Product Summary

- The DM14 is one of a series of new loudspeakers which together form the B&W DM range for the eighties. The design brief for the entire range was to benefit from the most sophisticated high technology tools.
- The DM14 follows the frequency linearity, freedom from all forms of distortion and colouration must be to monitor standard, and that the model should be fitted with audio powered overload protection.

### Technical highlights

- The driver configuration chosen consists of two 150mm bass/midrange drivers operating in a totally sealed enclosure, designed so as to ensure a low Q, well damped third order high pass characteristic.
- The HF section utilises the TW26 high frequency transducer. All the DM 14 drivers are over engineered so work totally within their limits of power output, frequency response and dispersion.
- The DM14 employs acoustic suspension rear loading for the bass/midrange drivers. The sealed enclosure is constructed of 12mm high-density particle board, laminated with 6mm bituminous pads, and a 19mm meditle front baffle assembly.

<b>Drive Units</b>	1 x 26mm polyester weave dome 26mm dia. high temperature voice coil 1 x 100mm midrange polyimide fibre matrix cone 2 x 150mm bass driver diameter Bextrene cone with PVA compound coating	<b>Sensitivity</b>	86dB spl at 1m
		<b>Nominal Impedance</b>	8 ohms
		<b>Power Handling</b>	15W. No upper limit because of overload protection device
		<b>Dimensions</b>	Height: 567mm Width: 256mm Depth: 295mm
		<b>Finish</b>	Standard: teakor walnut Special: black ash or rosewood
<b>Frequency Response</b>	80Hz - 20kHz ± 2dB free-field
