## General Safety Instructions

**WARNING!** Read and understand all instructions. Failure to follow all instructions listed below may result in electric shock, fire and/or serious personal injury.

### SAVE THESE INSTRUCTIONS

#### WORK AREA

- Keep your work area clean and well lit. Cluttered benches and dark areas invite accidents.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. Power tools create sparks which may ignite the dust or fumes.
- Keep bystanders, children, and visitors away while operating a power tool. Distractions can cause you to lose control.

#### ELECTRICAL SAFETY

- Grounded tools must be plugged into an outlet properly installed and grounded in accordance with all codes and ordinances. Never remove the grounding prong or modify the plug in any way. Do not use any adaptor plugs. Check with a qualified electrician if you are in doubt as to whether the outlet is properly grounded. If the tools should electrically malfunction or break down, grounding provides a low resistance path to carry electricity away from the user. **Applicable only to Class I (grounded) tools.**
- Double insulated tools are equipped with a polarized plug (one blade is wider than the other.) This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install a polarized outlet. Do not change the plug in any way. Double insulation  eliminates the need for the three wire grounded power cord and grounded power supply system. **Applicable only to Class II (double insulated) tools.**
- Avoid body contact with grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is grounded.
- Don't expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- Do not abuse the cord. Never use the cord to carry the tools or pull the plug from an outlet. Keep cord away from heat, oil, sharp edges or moving parts. Replace damaged cords immediately. Damaged cords increase the risk of electric shock.
- When operating a power tool outside, use an outdoor extension cord marked "W-A" or "W." These cords are rated for outdoor use and reduce the risk of electric shock. When using an extension cord, be sure to use one heavy enough to carry the current your product will draw. An undersized cord will cause a drop in line voltage resulting in loss of power and overheating. The following table shows the correct size to use depending on cord length and nameplate ampere rating. If in doubt, use the next heavier gage. The smaller the gage number, the heavier the cord.

		Minimum Gage for Cord Sets			
Volts	Total Length of Cord in Feet	0-25	26-50	51-100	101-150
120V					
240V					
Ampere Rating		AWG			
More Than	Not more Than				
0	6	18	16	16	14

#### PERSONAL SAFETY

- Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use tool while tired or under the influence of drugs, alcohol, or medication. A moment of inattention while operating power tools may result in serious personal injury.
- Dress properly. Do not wear loose clothing or jewelry. Contain long hair. Keep your hair, clothing, and gloves away from moving parts. Loose clothing, jewelry, or long hair can be caught in moving parts. Air vents often cover moving parts and should also be avoided.

- Avoid accidental starting. Be sure switch is off before plugging in. Carrying tools with your finger on the switch or plugging in tools that have the switch on invites accidents.
- Remove adjusting keys or wrenches before turning the tool on. A wrench or a key that is left attached to a rotating part of the tool may result in personal injury.
- Do not overreach. Keep proper footing and balance at all times. Proper footing and balance enables better control of the tool in unexpected situations.
- Use safety equipment. Always wear eye protection. Dust mask, non-skid safety shoes, hard hat, or hearing protection must be used for appropriate conditions.

#### TOOL USE AND CARE

- Use clamps or other practical way to secure and support the workpiece to a stable platform. Holding the work by hand or against your body is unstable and may lead to loss of control.
- Do not force tool. Use the correct tool for your application. The correct tool will do the job better and safer at the rate for which it is designed.
- Do not use tool if switch does not turn it on or off. Any tool that cannot be controlled with the switch is dangerous and must be repaired.
- Disconnect the plug from the power source before making any adjustments, changing accessories, or storing the tool. Such preventative safety measures reduce the risk of starting the tool accidentally.
- Store idle tools out of reach of children and other untrained persons. Tools are dangerous in the hands of untrained users.
- Maintain tools with care. Keep cutting tools sharp and clean. Properly maintained tools, with sharp cutting edges are less likely to bind and are easier to control.
- Check for misalignment or binding of moving parts, breakage of parts, and any other condition that may affect the tool's operation. If damaged, have the tool serviced before using. Many accidents are caused by poorly maintained tools.
- Use only accessories that are recommended by the manufacturer for your model. Accessories that may be suitable for one tool, may become hazardous when used on another tool.

#### SERVICE

- Tool service must be performed only by qualified repair personnel. Service or maintenance performed by unqualified personnel could result in a risk of injury.
- When servicing a tool, use only identical replacement parts. Follow instructions in the Maintenance section of this manual. Use of unauthorized parts or failure to follow maintenance instructions may create a risk of electric shock or injury.

#### Additional Safety Instructions for Sanders

- Accessories must be rated for at least the speed recommended on the tool warning label. Wheels and other accessories running over rated speed can fly apart and cause injury. Accessory ratings must be above listed minimum wheel speed as shown on tool nameplate.
- Hold tool by insulated gripping surfaces when performing an operation where the cutting tool may contact hidden wiring or its own cord. Contact with a "live" wire will make exposed metal parts of the tool "live" and shock the operator.
- Always wear eye protection and a respirator when sanding.
- Sanding of lead-based paint is not recommended. See Precautions To Take When Sanding Paint for additional information before sanding paint.
- Do not operate the unit without the dust collection bag.
- Clean your tool out periodically.
- Empty dust bag frequently, especially when sanding resin coated surfaces such as polyurethane, varnish, shellac, etc. Dispose of coated dust particles according to the finish manufacturer's guidelines, or place in a metal can with a tight-fitting metal lid. Remove coated dust particles from the premises daily. The accumulation of fine sanding dust particles may self ignite and cause fire.

**WARNING:** Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contains chemicals known to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- lead from lead-based paints,
- crystalline silica from bricks and cement and other masonry products, and
- arsenic and chromium from chemically-treated lumber (CCA).

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.

- Avoid prolonged contact with dust from power sanding, sawing, grinding, drilling, and other construction activities. Wear protective clothing and wash exposed areas with soap and water. Allowing dust to get into your mouth, eyes, or lay on the skin may promote absorption of harmful chemicals.

**WARNING:** Use of this tool can generate and/or disburse dust, which may cause serious and permanent respiratory or other injury. Always use NIOSH/OSHA approved respiratory protection appropriate for the dust exposure. Direct particles away from face and body.

**CAUTION:** Wear appropriate hearing protection during use. Under some conditions and duration of use, noise from this product may contribute to hearing loss.

- The label on your tool may include the following symbols. The symbols and their definitions are as follows:

V .....	volts	A.....	amperes
Hz .....	hertz	W .....	watts
min.....	minutes	~ .....	alternating current
====	direct current	n <sub>o</sub> .....	no load speed
<input type="checkbox"/>	Class II Construction	⊕ .....	earthing terminal
<input type="triangle"/>	safety alert symbol	.../min .....	revolutions per minute

### SAVE THESE INSTRUCTIONS

#### COMPONENTS (Fig. 1)

- |                        |                        |
|------------------------|------------------------|
| A. On/Off switch       | E. Vac-adaptor         |
| B. Clamp lever         | F. Paper clamp         |
| C. Base plate/pad      | G. Paper-limiting ribs |
| D. Dust collection bag |                        |

#### Motor

Your DEWALT tool is powered by a DEWALT-built motor. Be sure your power supply agrees with the nameplate marking (Volts, 120 AC only). A Voltage decrease of more than 10% will cause loss of power and overheating. All tools DEWALT tools are factory tested; if this tool does not operate, check the power supply.

#### Attaching Abrasive Paper (Fig. 1, 2)

**CAUTION:** Turn off and unplug the tool before making any adjustments or removing or installing attachments or accessories. Be sure the switch is in the OFF position.

Your sander is designed to use 1/4-sized sanding sheets. Pre-cut 4-1/2" x 5-1/2" sandpaper is available at extra cost.

#### TO MAKE 4-1/2" X 5-1/2" SANDPAPER

- Cut full-sized (9" x 11") sandpaper into 1/4 sheets of 4-1/2" x 5-1/2".
- Cut 1/2 sheet sandpaper into two 4-1/2" x 5-1/2" sheets.

For normal operation, assemble the abrasive paper to your unit as follows:

- Soften the stiff sandpaper by pulling it over the 90° edge of a table or other straight edge, as shown in Figure 2. Concentrate on softening the edges to be clamped.
- Release the clamp by pulling up on the clamp lever (B) and disengaging it from the tab on the base plate/pad (C).
- Insert the 4-1/2" edge of the abrasive paper under the front paper clamp (F) until it hits the paper-limiting ribs (G). Close the front paper clamp and hook it into the lock position behind the tab on the base plate/pad.
- Stretch paper over sanding pad and insert under the opposite clamp in the same way.
- If you are using the dust extraction feature, perforate the sandpaper (see Paper Punch).

### Switch (Fig. 3)

To turn the unit on, depress the side of the dust-protected switch (A) that corresponds to the symbol "I". To turn the tool off, depress the side of the switch that corresponds to the symbol "O".

### Paper Punch (Fig. 4, 5)

**CAUTION:** Turn off and unplug the tool before making any adjustments or removing or installing attachments or accessories. Be sure the switch is in the OFF position.

A paper punch (H) is provided with your sander to let you perforate regular sandpaper to make dust collection possible.

#### TO PERFORATE YOUR SANDPAPER

Install the sandpaper on the tool as instructed in this manual. With the sander turned off and unplugged, place the paper punch on the paper so that the tabs (I) at the edges of the punch are against any two adjacent sides of the sanding pad, as shown. Press the punch against the pad so that the 8 points penetrate the paper, as shown in Figure 5. (Press the punch into the pad as far as it will go.) Remove the paper punch and the paper is ready.

An alternate method of perforating the paper is to securely fasten the punch to a suitable work surface. Two holes are provided in the punch for this purpose. Use #8 flat head screws. Press the sander (with the paper attached) down on the punch.

### Dust Extraction (Fig. 6)

**CAUTION:** Turn off and unplug the tool before making any adjustments or removing or installing attachments or accessories. Be sure the switch is in the OFF position.

Your sander has two dust collection methods: a twist-on dust collection bag (D) and a built-in vac-adaptor (E) which can be hooked directly to a shop vacuum system.

#### TO EMPTY DUST BAG

1. While holding the sander, grasp the dust collection bag (D) at the end nearest the sander and twist off of the vac-adaptor (E).
2. Gently shake or tap the dust collection bag to empty.
3. Twist dust collection bag back onto the vac-adaptor.

You may notice that all the dust will not come free from the bag. This will not affect sanding performance but will reduce the sander's dust collection efficiency. To restore your sander's dust collection efficiency, depress the spring inside the dust bag when you are emptying it and tap it on the side of the trash can or dust receptacle.

**CAUTION:** Never operate these tools unless the dust collector is in place. Sanding dust exhaust may create a breathing hazard.

### OPERATION (Fig. 7)

To operate your sander, grasp it as shown in Figure 7A or 7B and turn it on. Move it in long, sweeping strokes along the surface being sanded, letting the sander do the work. Pushing down on the tool while sanding actually slows the removal rate and produces an inferior quality surface. Be sure to check your work often, this sander is capable of removing material rapidly, especially with coarse paper.

Your sander is designed to sand flush on three sides for sanding in corners, and its small size and light weight make it ideal for overhead work.

The orbital action of your sander allows you to sand with the grain or at any angle across it for most sanding jobs. On the final sanding steps, as discussed below, a better finish will result if you sand only with the grain.

To produce the best finish possible, start with coarse grit sandpaper and change gradually to finer and finer paper. A final sanding with a piece of well-worn fine sandpaper will produce a professional-looking finish that in many cases will need no hand sanding at all. The rate at which the dust collection bag will fill up will vary with the type of material being sanded and the coarseness of the sandpaper. For best results, empty the bag frequently and check the opening for clogging.

When sanding painted surfaces, you may find that the sandpaper loads up and clogs with paint. A heat gun will work much better to remove paint before sanding. FOLLOW ALL SAFETY INSTRUCTIONS IN HEAT GUN INSTRUCTION MANUAL.

### Precautions To Take When Sanding Paint

1. Sanding of lead based paint is NOT RECOMMENDED due to the difficulty of controlling the contaminated dust. The greatest danger of lead poisoning is to children and pregnant women.
2. Since it is difficult to identify whether or not a paint contains lead without a chemical analysis, we recommend the following precautions when sanding any paint:

#### PERSONAL SAFETY

1. No children or pregnant women should enter the work area where the paint sanding is being done until all clean up is completed.
2. A dust mask or respirator should be worn by all persons entering the work area. The filter should be replaced daily or whenever the wearer has difficulty breathing. See your local hardware store for the proper N.I.O.S.H. approved dust mask.
3. NO EATING, DRINKING or SMOKING should be done in the work area to prevent ingesting contaminated paint particles. Workers should wash and clean up BEFORE eating, drinking or smoking. Articles of food, drink, or smoking should not be left in the work area where dust would settle on them.

#### ENVIRONMENTAL SAFETY

1. Paint should be removed in such a manner as to minimize the amount of dust generated.
2. Areas where paint removal is occurring should be sealed with plastic sheeting of 4 mils thickness.
3. Sanding should be done in a manner to reduce tracking of paint dust outside the work area.

#### CLEANING AND DISPOSAL

1. All surfaces in the work area should be vacuumed and thoroughly cleaned daily for the duration of the sanding project. Vacuum filter bags should be changed frequently.
2. Plastic drop cloths should be gathered up and disposed of along with any dust chips or other removal debris. They should be placed in sealed refuse receptacles and disposed of through regular trash pick-up procedures. During clean up, children and pregnant women should be kept away from the immediate work area.
3. All toys, washable furniture and utensils used by children should be washed thoroughly before being used again.

### Tool Care

- Keep your machine as clean as possible by wiping with a clean cloth and blowing through it with air after every 5 hours of use.
- Don't use harsh chemicals or solvents to clean the tool. These chemicals could seriously damage the plastic.
- Avoid overloading your sander. Overloading will result in a considerable reduction in speed and efficiency and the unit will become hot. In this event, run sander at a "no load" condition for a minute or two.

### Brush Replacement (Fig. 8, 9)

**CAUTION:** Turn off and unplug the tool before making any adjustments or removing or installing attachments or accessories. Be sure the switch is in the OFF position.

#### TO REPLACE BRUSHES

1. Remove the three screws from the top cap and lift off the top cap, as shown in Figure 8.
2. Pull the brush spring (J) back (be careful not to pull completely off) and slide out the old brush.
3. Pull the brush wire (L) which is connected to the brush, out of the motor field (K).
4. Plug the new brush wire back into the motor field.
5. Still holding the brush spring back, slide in the new brush with the wire coming out the top of the brush and release the brush spring.
6. Repeat steps 1-5 for the second brush.
7. Replace the top cap and tighten the three screws. Be careful not to over-tighten screws.
8. Always replace both brushes.

### Accessories

Recommended accessories for use with your tool are available at extra cost from your local dealer or authorized service center. If you need assistance in locating any accessory for your tool, contact: DEWALT Industrial Tool Co., 701 East Joppa Road, Baltimore, MD 21286 or call 1-800-4-DEWALT (1-800-433-9258).

FIG. 1

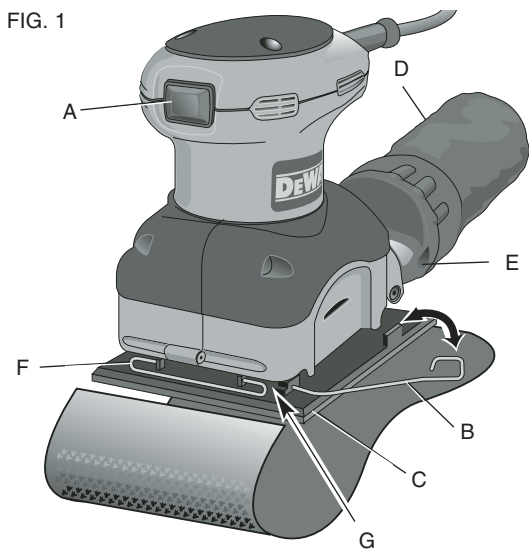

FIG. 2

FIG. 3

FIG. 4

FIG. 5

FIG. 6

FIG. 7A

FIG. 7B

FIG. 8

FIG. 9

**CAUTION:** The use of any other accessory not recommended for use with this tool could be hazardous.

### Lubrication

Self lubricating bearings are used in the tool and periodic relubrication is not required. However, it is recommended that, once a year, you take or send the tool to a service center for a thorough cleaning and inspection.

### Repairs

To assure product SAFETY and RELIABILITY, repairs, maintenance and adjustment should be performed by authorized service centers or other qualified service personnel, always using identical replacement parts.

### Three Year Limited Warranty

DEWALT will repair, without charge, any defects due to faulty materials or workmanship for three years from the date of purchase. This warranty does not cover part failure due to normal wear or tool abuse. For further detail of warranty coverage and warranty repair information, visit [www.dewalt.com](http://www.dewalt.com) or call 1-800-4-DEWALT (1-800-433-9258). This warranty does not apply to accessories or damage caused where repairs have been made or attempted by others. This warranty gives you specific legal rights and you may have other rights which vary in certain states or provinces.

2. Ya que es difícil identificar si una pintura contiene plomo o no, sin antes hacer un análisis químico, le recomendamos que se tomen las siguientes precauciones cuando lije cualquier pintura:

#### SEGURIDAD PERSONAL

1. Ningún niño o mujer embarazada debería entrar al área de trabajo donde se está lijando la pintura hasta que se termine de limpiar el área.
2. Toda persona que entre al área de trabajo debe usar una máscara antipolvo o respirador. El filtro debería ser reemplazado a diario o cuando el usuario tenga dificultades para respirar. Visite su ferretería local para obtener una máscara antipolvo apropiada, aprobada por N.I.O.S.H.
3. NO se debe COMER, BEBER ni FUMAR en la zona de trabajo, para evitar la ingestión de partículas de pintura contaminadas. Los trabajadores deberán lavarse bien ANTES de comer, beber o fumar. No debe dejarse comida, bebida ni tabaco en la zona de trabajo, donde el polvo se podría posar sobre ellos.

#### SEGURIDAD MEDIOAMBIENTAL

1. La pintura debe ser quitada de tal manera que se minimice la cantidad de polvo generada.
2. Aquellas áreas en las que se está quitando pintura deberían ser selladas con láminas de plástico de 4 mm de grosor.
3. El lijado debería hacerse de modo que se reduzca la cantidad de polvo de pintura que se lleve afuera.

#### LIMPIEZA Y ELIMINACIÓN

1. Todas las superficies de la zona de trabajo deben de ser aspiradas y limpiadas en profundidad todos los días mientras dure el proyecto de lijado. Las bolsas de filtrado de la aspiradora se deben cambiar con frecuencia.
2. Disponga de cubiertas plásticas junto con cualquier astilla de polvo u otro desecho del proceso de lijado. Deberán colocarse en un recipiente para desechos sellado y eliminarse de acuerdo con los procedimientos de eliminación de la basura normal. Durante la limpieza, mantenga alejados a niños y mujeres embarazadas de la zona de trabajo.
3. Todos los juguetes, muebles lavables y utensilios usados por niños deberán lavarse a fondo antes de volverlos a usar.

### Cuidado de la herramienta

- Mantenga la lijadora tan limpia como sea posible, pasándole un trapo limpio y soplando aire a través de ella cada cinco horas de funcionamiento.
- No utilice químicos o solventes fuertes para limpiar la herramienta. Estos químicos podrían causar graves daños al plástico.
- Evite sobrecargar la lijadora. Las sobrecargas resultarán en una velocidad y eficiencia considerablemente menores y la unidad se hará caliente. En este caso, opere la lijadora sin carga por uno o dos minutos.

### Sustitución de las escobillas (Fig. 8, 9)

**PRECAUCIÓN:** Apague y desenchufe la herramienta antes de hacer cualquier ajuste o de quitar o instalar accesorios. Asegúrese que el conmutador esté en posición OFF (apagada).

#### PARA CAMBIAR LAS ESCOBILLAS

1. Retire los tres tornillos de la tapa superior y levante la tapa, como lo muestra la Figura 8.
2. Tire el resorte de la escobilla (J) hacia atrás (cuidando de no sacarla completamente) y deslice de él la escobilla vieja.
3. Tire del alambre de la escobilla (L) el cual está conectado a la escobilla, para sacarlo del campo inductor del motor (K).
4. Enchufe el alambre nuevo de la escobilla de vuelta en el campo inductor del motor.
5. Mientras sostiene aún el resorte de la escobilla, deslice la nueva escobilla con el alambre saliendo de la parte de arriba de la escobilla y suelte el resorte de la escobilla.
6. Repita los pasos 1–5 para la segunda escobilla.
7. Cambie la tapa superior y ajuste los tres tornillos. Tenga cuidado de no ajustar los tornillos demasiado.
8. Sustituya siempre ambas escobillas.

### ACCESORIOS

Los accesorios recomendados para su herramienta están disponibles por un cargo adicional en su distribuidor local o en el centro de servicio autorizado. Si necesita ayuda para encontrar un accesorio para su herramienta, contacte a: DeWALT Industrial Tool Co., 701 East Joppa Road, Baltimore, MD 21286 (1-800-4-DEWALT).

**PRECAUCIÓN:** La utilización de cualquier accesorio no recomendado para esta herramienta puede ser peligrosa.

### Lubricación

La herramienta incorpora cojinetes autolubrificantes, por lo que no requiere lubricación periódica. Sin embargo, se recomienda que una vez al año un centro de servicio proceda a una inspección y limpieza a fondo de la herramienta.

### Reparaciones

Para garantizar la SEGURIDAD y la CONFIABILIDAD, deberán hacerse reparaciones, mantenimiento y ajustes de esta herramienta en los centros autorizados de servicio DeWALT u otras organizaciones autorizadas. Estas organizaciones prestan servicio a las herramientas DeWALT y emplean siempre refacciones legítimas DeWALT.

### Póliza de Garantía

#### IDENTIFICACIÓN DEL PRODUCTO:

Sello o firma del Distribuidor.

Nombre del producto: \_\_\_\_\_ Mod./Cat.: \_\_\_\_\_

Marca: \_\_\_\_\_ Núm. de serie: \_\_\_\_\_

(Datos para ser llenados por el distribuidor)

Fecha de compra y/o entrega del producto: \_\_\_\_\_

Nombre y domicilio del distribuidor donde se adquirió el producto: \_\_\_\_\_

Este producto está garantizado por un año a partir de la fecha de entrega, contra cualquier defecto en su funcionamiento, así como en materiales y mano de obra empleados para su fabricación. Nuestra garantía incluye la reparación o reposición del producto y/o componentes sin cargo alguno para el cliente, incluyendo mano de obra, así como los gastos de transportación razonablemente erogados derivados del cumplimiento de este certificado.

Para hacer efectiva esta garantía deberá presentar su herramienta y esta póliza sellada por el establecimiento comercial donde se adquirió el producto, de no contar con ésta, bastará la factura de compra.

#### EXCEPCIONES.

Esta garantía no será válida en los siguientes casos:

- Cuando el producto se hubiese utilizado en condiciones distintas a las normales;
- Cuando el producto no hubiese sido operado de acuerdo con el instructivo de uso que se acompaña;
- Cuando el producto hubiese sido alterado o reparado por personas distintas a las enlistadas al final de este certificado.

Anexo encontrará una relación de sucursales de servicio de fábrica, centros de servicio autorizados y franquiciados en la República Mexicana, donde podrá hacer efectiva su garantía y adquirir partes, refacciones y accesorios originales.

### Garantía limitada por tres años

DeWALT reparará, sin cargo, cualquier falla que surja de defectos en el material o la fabricación del producto, por hasta tres años a contar de la fecha de compra. Esta garantía no cubre fallas de las piezas causadas por su desgaste normal o abuso a la herramienta. Para mayores detalles sobre la cobertura de la garantía e información acerca de reparaciones realizadas bajo garantía, visítenos en [www.dewalt.com](http://www.dewalt.com) o diríjase al centro de servicio más cercano. Esta garantía no aplica a accesorios o a daños causados por reparaciones realizadas o intentadas por terceros. Esta garantía le otorga derechos legales específicos, además de los cuales puede tener otros dependiendo del estado o provincia en que se encuentre.

Además de la garantía, las herramientas DeWALT están cubiertas por:

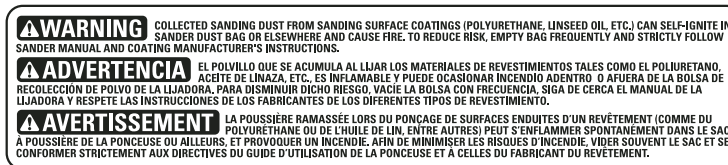

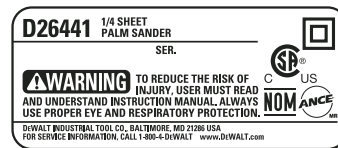

#### 1 AÑO DE SERVICIO GRATUITO

DeWALT mantendrá la herramienta y reemplazará las piezas gastadas por su uso normal, sin cobro, en cualquier momento durante un año a contar de la fecha de compra.

#### GARANTÍA DE REEMBOLSO DE SU DINERO POR 90 DÍAS

Si no está completamente satisfecho con el desempeño de su máquina herramienta, láser o clavadora DeWALT, cualquiera sea el motivo, podrá devolverlo hasta 90 días de la fecha de compra con su recibo y obtener el reembolso completo de su dinero – sin necesidad de responder a ninguna pregunta.

**SUSTITUCIÓN GRATUITA DE LAS ETIQUETAS DE ADVERTENCIA:** Si sus etiquetas de advertencia se vuelven ilegibles o se pierden, llame al 1-800-544-6986 para conseguir repuestos gratuitos.
